github.com/AkashPriyadarshii

Sole developer of `tdlib-android` — the only automated precompiled TDLib Android distribution in existence. 5 years zero-failure fintech operations running in parallel. Ships production-grade Android, full-stack, and open-source projects with no team, no budget, no shortcuts. Everything runs on free tiers and a 4GB RAM Windows machine.

## EXPERIENCE

### Banking Operations Executive

2021 – Present

#### SBI Customer Service Point, Patna

- Processed 200+ daily transactions on SBI national infrastructure — 5 consecutive years, zero audit failures
- Owned end-to-end compliance: account lifecycle management, cash reconciliation, and regulatory reporting
- Resolved customer escalations and coordinated with district banking hub on compliance queries

### Technical Support Specialist

2022 – Present

#### Freelance

- Deployed and configured biometric authentication hardware (Morpho, Mantra) for financial identity verification
- Delivered remote technical resolution via AnyDesk and TeamViewer across multiple client engagements

## PROJECTS

### tdlib-android

The only automated precompiled TDLib distribution for Android. All 4 ABIs supported with zero-friction Gradle setup and Kotlin Coroutines/Flow wrappers.

[Kotlin](#) [Android](#) [Telegram API](#)

### Personal Site

Production portfolio and ops hub. Next.js 16, Supabase (PostgreSQL + RLS), TypeScript. HMAC SHA-256 magic link auth. 92 releases, 150 deployments live.

[Next.js](#) [TypeScript](#) [Supabase](#)

### awesome-agentic-stack

Audited 386 repos. 96 survived. Curated zero-rupee workflow toolkit for solo developers working under tight hardware and token constraints. MIT licensed, public.

[Developer Tools](#) [Open Source](#)

### My-Starred-Repos

Auto-updating GitHub starred repos tracker with glassmorphism dashboard. PWA, 6 themes, GitHub Actions daily sync pipeline.
